

Software Engineering Project

Team Name: ctrlC ctrlV

High Point University • CSC 4710 • Spring, 2026

Status Report

Dates: 1/13/26 - 1/30/26

Members	User ID	Phone
Alina Zimavaya	azimavay@highpoint.edu	(919) - 791 – 7215
Luke Fixari	lfixari@highpoint.edu	(614) - 981 – 9543
Crawford James	cjames@highpoint.edu	(980) - 622 – 2961
Alex Wilcox	awilcox@highpoint.edu	(703) - 945 - 5007

1/13/26

- General information about each member is shared with the others.
- Acquired member phone numbers and started group chats between us.
- Team name created: ctrlC ctrlV
- Meeting times figured out
- GitHub and template are made

1/16/26

- Functional Requirements are created in a document for:
 - Clients
 - Software
 - UI/Login
- First client meeting the upcoming week

1/20/26

- Lab 1 is returned to the group with feedback from the client.
- Requirements for what is going to be in our system are completed.
- Questions for the first client meeting are being made.

- Created a Python file that has all the information about the airports needed in our project.

1/21/26

- The first client meeting was held.
- Make sure to set goals for each week for all members and even the group as a whole.
- Weekly checks on GitHub
- Work Breakdowns
 - What each individual did on the project up to date.
- Deliverables will be done on GitHub
- Questions were asked to the client, and answers were provided and have been documented by the team.

1/23/26

- Individuals must keep records of what they have done on this project.
- First Walkthrough 2-2-26
- Project Plan is a big goal to complete as a group.

1/27/26

- Client meeting on the 28th
- Walkthrough requirements were talked about, so we know what needs to be on that presentation.
- All requirements have been documented in our group meeting notes.

1/28/26

- Second client meeting held today
- Fix/add constraints in the future if needed.
- Journals must be up to date after every meeting.
- Requirements needed for software and hardware for the creation and running of the product.
- Group Goal:
 - Have the first walkthrough done and know what everyone is going to say on it.
 - Project Plan done

- Become more familiar with the react environment.
 - Touch the backend
- Additional Questions were asked to the client, and responses have been documented in group notes file.

1/30/26

- Ideas about additional slides that could be added to first walk through presentation were discussed between the team
